FOR IMMEDIATE RELEASE

Enterprise-grade Project Management Software Becomes Affordable to Small Businesses and Start-ups

New hosted pricing structure for hosted license packages offers savings of over 60%

Toronto, Canada -- September 23, 2009 – Due to rising industry and client demand, Logic Software Inc., provider of web-based all-in-one project management software, announced today special, hosted subscription pricing for its web based project management and collaboration software Easy Projects .NET. New customers can now sign-up for a SaaS (software as a service) 5-user license pack at a “Start-Up” price of (US) \$75 per month, and benefit from further savings of up to 40% off available to 10, 50 and 100 user packages.

Aimed at smaller project teams and businesses that usually are unable to benefit from the volume price breaks offered to large organizations and enterprises, new customers can further save an additional 15% to 25% off by subscribing to a quarterly or annual payment plan.

“We have received tremendously positive client feedback when we announced start-up pricing and discounts for our self-install, in-house licenses.” says Vadim Katcherovski, CEO of Logic Software Inc. “With the release of a new version which integrates a real-time conferencing and asynchronous collaboration platform into project management, we decided to introduce this special pricing structure to our hosted licenses as well, allowing our new clients to take full advantage of these exciting product features. Along with our Free package, this offer ensures that any company, no matter what size, can take advantage of the amazing productivity and efficiency improvements which result from the usage of project management software. And that is especially true during the tough economic situation we face right now.”

Easy Projects .NET is designed to help a novice user create their first project in less than three minutes, be accessible to all stakeholders via a secure web connection, combining all major modules required for successful team collaboration under a single roof, including:

- Unlimited Projects and Tasks
- Time Tracking

- Issue Tracking and Change Request Management
- Online Collaboration (File Sharing and Message Boards)
- Resource Management Tools and Reports
- Portfolio Management
- Custom Fields and Reports
- Unlimited Customer Access

The “Start-Up” price of (US) \$75 per month for a 5 user license offers savings of over 60%, which can be combined with an additional savings of up to 25% when purchasing an annual subscription. With the introduction of this special pricing model and collaboration features of Version 6.2, Easy Projects .NET presents an effective opportunity for web and graphic designers, marketing specialists, event planners, legal professionals and smaller enterprises to get started in project management. A risk-free, 15 day trial is available at www.easyprojects.net/trial/

Further detailed pricing information is available at www.easyprojects.net/Plans/
