FOR IMMEDIATE RELEASE

Easy Projects .NET and Vview Announce Integration Partnership

Easy Projects .NET becomes the first and only web-based project management software to support real-time, online conferencing and any-time, offline asynchronous collaboration

Toronto, Canada -- September 30, 2009 -- Easy Projects .NET, a web-based project management software, and Vview, a real time conferencing and any-time collaboration platform, today announced immediate availability of an integration between the two products.

With this integration, Easy Projects .NET users will now be able to conduct real-time, online meetings using built-in Vview tools such as Web Video, VOIP, Desktop Sharing, Whiteboards, Text Chats as well as engage in any-time and always-on, asynchronous collaboration where user input can be tracked, filtered and annotated. Unlike other web conferencing products, Vview allows users to capture content and discussions from meeting to meeting and track team member input in-between meetings.

The adoption of project management software and team collaboration tools has been on the rise in recent years. These tools benefit workgroups by improving resource management, reducing costs, decreasing development time and streamlining communications. For companies with large teams, resources and customers all around the world, the adoption of powerful project lifecycle management and flexible team collaboration tools is essential.

The integration between Easy Projects .NET and Vview brings project management together with real-time, online conferencing, desktop sharing and always-on, asynchronous collaboration. This allows project teams to effectively manage their projects and engage with remote users through live meetings and contextual discussions at their convenience. The integration of these two products becomes useful in situations which require collaboration, review and approval. For example, graphic and web designers, marketing and legal professionals can share concept drawings, brochures, news releases, contracts and files which can then be accessed and annotated by team members, clients and managers from anywhere in the world. Combined together, these products create virtually unlimited possibilities for project lifecycle management and collaboration, all through one interface.

“Our philosophy is to keep project management easy, while providing many resourceful features.” says Vadim Katcherovski, CEO of Easy Projects .NET. “Project management is not just about resource balancing and activity tracking. Today more and more teams have a growing need of an online environment to discuss ideas and share content for review and collaboration. With Vview, Easy Projects

.NET gives them an opportunity to do just that: plan, manage, meet and share content both online and off.”

Henry Hon, CEO of Vyew, picks up on that thought. “As distributed workgroups are increasing around the world in both large and small enterprises, this integration between Easy Projects .NET and Vyew provides the tools to significantly improve efficiency, management and collaboration” says Hon. “Every project is a battle to complete on budget and schedule and we are providing the ‘war room’ for workgroups to do this successfully.”

The integration, developed by Easy Projects .NET in support with Vyew, is part of the newly released Easy Projects .NET Version 6.2. This update also offers comprehensive module sets including Timesheets, Issue Tracking, Change Request and Resource Management along with Unlimited Meetings with up to 10 real-time participants and 20 meeting workspaces which can be linked to projects and saved for future collaboration and review. Easy Projects .NET Version 6.2 is available as a hosted solution starting at \$24.99/month per user or less, and as a FREE update to all existing, up-to-date hosted accounts. Full pricing information is available at www.easyprojects.net/Plans/

For a full list of Easy Projects .NET Version 6.2 features, 15-day Trial Sign-Up and a more information on integration with Vyew, please visit www.easyprojects.net

About Easy Projects .NET

Easy Projects .NET (www.easyprojects.net) is a Web 2.0, Ajax-based project management and collaboration software with integrated time, issue, and request tracking tools. It is used in over 50 countries by some of the world’s largest organizations including Reuters, Symantec, Staples, United Nations, Lockheed Martin, Centers for Disease Control and Prevention, Ernst & Young, University of California and more. Now in its 6th version, Easy Projects .NET has been developed by Logic Software Inc. since 2003.

About Vyew

Vyew (www.vyew.com) is the Collaborative WarRoom™, a browser-based environment where content is shared, communication takes place, workflow is enabled and all are captured, integrated and managed. Vyew’s real-time, any-time and over-time (persistent) platform has a number of patent pending functionalities to make the Collaborative WarRoom™ what it is: A group communication and efficiency tool to help everyone win. Vyew also includes functions from these software categories, web conferencing, document management, and wiki. Located in Berkeley, CA since 2004, Vyew is conceived and developed by a group of graduates from UC Berkeley.
