FOR IMMEDIATE RELEASE

Interactive Gantt Chart Functionality Now Available On The Web

Easy Projects .NET brings desktop-based application technology online; developing a full-screen, interactive project and resource management tool which features drag-and-drop scheduling, zoomable Gantt charts and in-line task editing.

Toronto, Canada – October 08, 2009 -- Logic Software Inc., announced today the introduction of a new Interactive Gantt chart feature for its leading Web 2.0, Ajax-based project management and collaboration software, Easy Projects .NET.

The interactive functionality of Gantt charts which was previously mainly available on desktop applications is brought to web-based project management using the latest Microsoft Silverlight technology. With Easy Projects .NET the Interactive Gantt chart steps outside the boundaries and limitations of usual online project planning and reporting. Unlike most web-based Gantt chart tools, the Interactive Gantt chart provides a unique full-screen graphing capability allowing project managers to plan and co-ordinate project tasks with options such as zoom, print, in-line editing, as well as drag-and-drop task scheduling, resource planning and activity assignments.

“We aim to make project management easy and with Gantt charts being such a commonly used tool in online project planning and reporting, we wanted to enhance and improve the way they are utilized by project managers.” says Vadim Katcherovski, CEO of Logic Software Inc. “By bringing the technology used in desktop applications to the Interactive Gantt chart, you can now create your project schedule 3-4 times faster. With feedback from accomplished project managers we created an interface which allows you to create and edit tasks on the fly, while having a complete project schedule overview on the other side.”

The Interactive Gantt Chart is available as a free update to the newly released Easy Projects .NET Version 6.2, which also features:

- Unlimited Projects and Tasks Time Tracking
- Issue Tracking and Change Request Management

- Real-Time Conferencing with Vyew (Meetings, VOIP, Webcams)
- Any-Time Asynchronous Collaboration with Vyew (Share Files, Review and Work on Content)
- Resource Management Tools and Reports
- Portfolio Management
- Custom Fields and Reports
- Unlimited Customer Access

Easy Projects .NET is available as a hosted solution starting at \$24.99/month per user or less. Full pricing information and a FREE Trial Sign-Up are available at <http://www.easyprojects.net/Plans/>

About Easy Projects .NET

Easy Projects .NET (www.easyprojects.net) is a Web 2.0, Ajax-based project management and collaboration software with integrated time, issue, and request tracking tools. It is used in over 50 countries by some of the world's largest organizations including Reuters, Symantec, Staples, United Nations, Lockheed Martin, Centers for Disease Control and Prevention, Ernst & Young, University of California and more. Now in its 6th version, Easy Projects .NET has been developed by Logic Software Inc. since 2003.
